

GRIB LED <250LM GE

In the dark, you need something to hold onto to move safely through a room. Grib gives you an overview of the situation, and this small landmark will easily lead you to your destination. The name Grib is reminiscent of a 'grip' or a 'handle', and this fitting looks like that too. It is a small, sleek rectangle containing a fine LED light strip. Grib is available in white or black.

Art. Nr. 12310032
