

MARTY LED GE

Simple concepts are often the best. Marty is a modern version of the classic light bulb, but it is handier and more economical. The LED fitting has a click-and-turn system which makes it extremely easy to install. Used as orientation lighting, Marty will guide you safely upstairs or downstairs in the dark; installed by the mirror it will create a modern glamour effect. Used in a group, Marty also offers many different decorative options. Ideal for creative brains.

Art. Nr. 11380111

SPECIFICATIONS
